📁 Portfolio

Summary

Experienced Software Engineer with 4+ years in designing, developing, and securing scalable backend systems using **Java 21**, **Spring Boot**, and **Azure**. Specialized in microservices architecture, event-driven design (Azure service bus), containerization (Docker, Kubernetes), REST APIs, and cloud-native applications. Adept at implementing robust security mechanisms (Spring Security) and enhancing application performance. Familiar with **enterprise system integration patterns**, including SAP-connected ecosystems.

Work Experience

Software Engineer

Cognizant Technology Solutions

July 2023 – Present

- Designing and developing Java Spring Boot microservices for enterprise backend systems.
- Building and maintaining RESTful APIs consumed by multiple internal and external services.
- Deploying containerized applications using Docker and Azure Kubernetes Service (AKS).
- Implementing CI/CD pipelines using GitHub Actions and Maven.
- Applying Spring Security, OAuth2, and JWT for secure authentication and authorization.
- Monitoring production systems using Datadog and Kibana.
- Collaborating with cross-functional teams in Agile (Scrum and Kanban) environments.

Junior Software Engineer

Cognizant Technology Solutions

July 2021 – June 2023

- Developed backend components using Java and Spring Boot framework.
- Built and integrated REST APIs with enterprise backend services.
- Worked on batch and middleware applications to process large volumes of data.
- Supported cloud migration tasks and containerization efforts.
- Maintained code quality through unit testing and peer code reviews.
- Documented technical solutions using JIRA and Confluence.

Technical Skills

- **Languages:** Java 21, JavaScript
- **Frameworks:** Spring Boot, Spring WebFlux
- **Enterprise Integration:** Integration with SAP- and Salesforce-connected systems, REST/SOAP APIs, Batch and file-based integrations (SFTP/SMB), Middleware services
- **Security:** OAuth2, Spring JWT, Azure AD
- **Cloud:** Microsoft Azure
- **Containers:** Docker, Kubernetes
- **Messaging:** Azure Bus Service
- **Databases:** SQL Server, IBM DB2, PostgreSQL
- **Protocols:** REST, GraphQL, SOAP
- **CI/CD:** GitHub Actions
- **Monitoring:** Datadog
- **Version Control:** Git, GitHub, Bitbucket
- **Tools:** IntelliJ, Eclipse, VS Code, Jira, Confluence
- **OS:** Linux, Windows

Projects

Customer Master Data Management

- Designed and implemented backend services to manage and maintain customer master data for banking and insurance clients, ensuring high data accuracy and consistency across multiple systems.
- Developed and exposed RESTful APIs using Spring Boot to create, update, and retrieve customer records, enabling seamless integration with downstream applications and third-party systems.
- Implemented data validation, error handling, logging, and retry mechanisms to ensure fault-tolerant and reliable operations.
- Automated synchronization between internal PostgreSQL/MySQL databases and external applications, reducing manual effort and operational errors.
- Collaborated with cross-functional teams to define integration requirements, optimize workflows, and enhance system performance.

Technologies Used: Java 17, Spring Boot, Spring MVC, Spring Security, REST API, JPA/Hibernate, PostgreSQL, MySQL, Azure Service Bus (ASB), Datadog, Kibana, Maven, Git, CometD

Automated Report Generation System

- Designed and developed a backend system to automate report generation for internal teams and clients, reducing manual effort.
- Built REST APIs to trigger report creation and retrieve processed data.
- Processed large datasets using batch jobs and scheduled tasks with Spring Batch.
- Optimized job performance, implemented error handling, and ensured timely delivery of reports.
- Collaborated with QA and operations teams to ensure system reliability.

Technologies Used: Java 21, Spring Boot, Spring Batch, REST API, MySQL, Apache POI, Microsoft Graph API

Cloud Migration and Microservices Modernization

- Migrated legacy on-premise microservices to Azure cloud, refactoring services for better performance and scalability.
- Containerized applications using Docker and deployed them on Azure Kubernetes Service (AKS).
- Refactored REST APIs and integrated middleware services to maintain compatibility with downstream systems.
- Monitored applications using Datadog and Kibana to ensure smooth operation post-migration.
- Collaborated with cross-functional teams to define migration strategy and implement cloud best practices.

Technologies Used: Java 21, Spring Boot, REST API, Docker, Azure, AKS, Maven, Git, Datadog, Kibana

Certifications

- Certified in **Microsoft Azure Fundamentals (AZ-900)**

Education

Bachelor of Technology in Computer Science and Engineering

Future Institute of Technology, Kolkata 2018 – 2021

Diploma in Computer Science and Engineering

JP Institute of engineering and technology, Meerut 2014 – 2017
